## New York City Charter Schools are Growing...

### Growth in NYC Charter School Sector, 2000-2018

**The future of our schools, our children, and our livelihoods are at stake! We need to fight!**

**\*VERY IMPORTANT NOTE-** Information obtained by the Teachers Diversity Committee (TDC) of NYC from Success Academy charter schools, showed that for the 2013-2014 school year, 13 out of 15 locations have a significantly higher percentage of white teachers than was the city wide average for public schools in NYC which in 2012, was 58.6%. The mandate to expand charters is increasing racial segregation of students and decreasing teacher diversity in NYC schools overall.

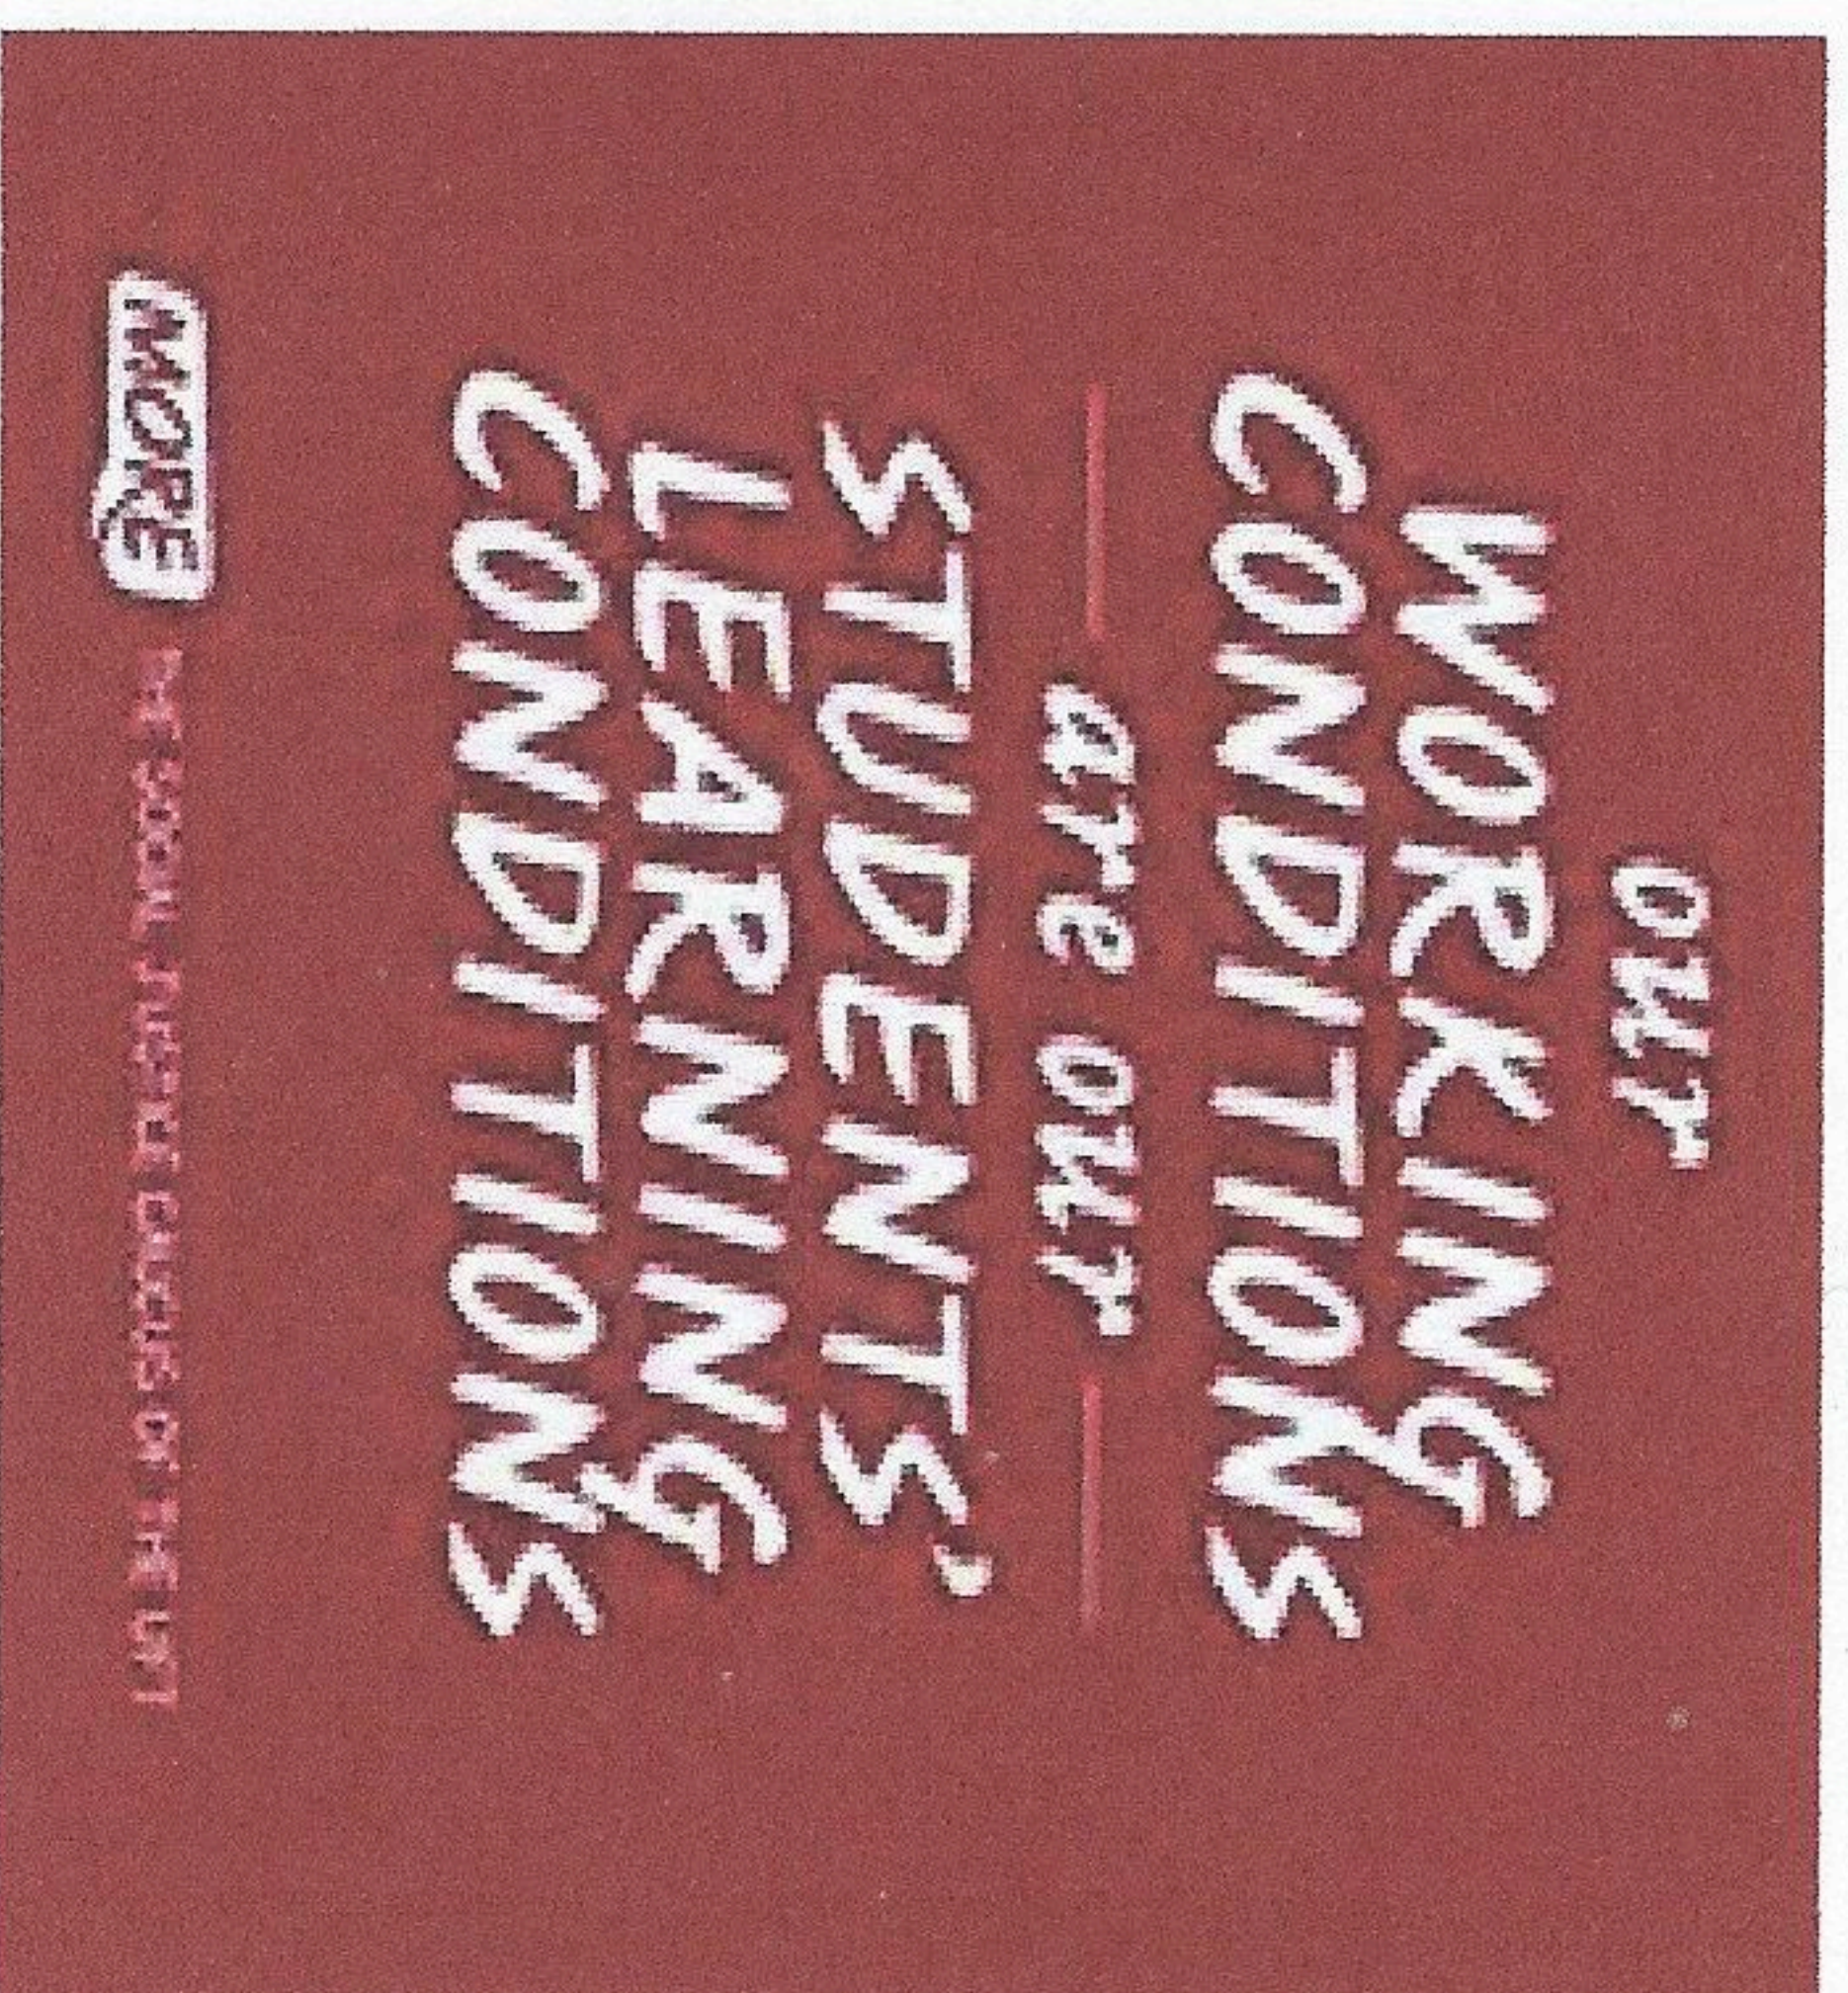

#### How you can help-

**Charter-school co-location hearings:** Join us as we stand together with parents, students, and fellow UFTers against the privatization of our schools and defend public schools that serve the local community. **MORE** stands against the proliferation of charter schools crowding out district schools for teachers, rooms and other resources in favor of charters that do not serve all our children. Charters are often run by corporations as for-profits.

**Contact:** You can contact Lauren about upcoming hearings and PEPs. You can also contact Windy to mobilize your school's efforts to fight back.

## The Truth About

### Charters

Brought to you by

Charter schools continue to receive a windfall to the tune of tens of millions of potential dollars in free space, either in a public school or in a city-subsidized private space, more per pupil funding than public schools, and an essentially unfettered ability to expand at the expense of existing public schools. The charter school giveaways are nothing short of a death sentence for the sustainability of New York City's public school system

**Charters=your tax \$\$\$ money pit**
